

BIO - - The band was formed in 2012, in Rostov-on-Don, Russia. It all was started with cognac and improvisation of drummer and guitarist. Improvisation was made in favorite stoner metal style. Later we decided to collect the full lineup and to record an album. Six months later, an album titled "INSIDE", was recorded and mixed in a cozy studio, in Taganrog. The lineup was varied from time to time, but it hasn't influenced to the group's work as a whole. Today the group is strong, like their music, which finds it's listeners worldwide. Their live performances rocks the walls of clubs, and our behavior on the stage, sometimes, looks like a pure madness and insanity.
