

BIOGRAPHY

The band was established back in September 2011 with the name "Heavy Chains". This name represents the oppression, this huge burden society is imposing us to carry for many reasons like race, gender, sexual orientation, religious beliefs or even musical taste. What makes us different from other bands is that we try to combine fast and heavy styles like thrash, speed, and even power metal with the classical clean heavy metal vocals that give the band its characteristic strong but always melodic sound.

In 2013 we had good international shows with Mexican Legend Band Transmetal and Legendary Thrash Metal from the United States Whiplash.

January the 1st 2014 was the released of our first record Deathstalker. Right now we are promoting our material playing in small gigs in our country.
