

Inspired by many styles of music, it's the Blues that truly drive Johnny wild. In his youth, Johnny's appetite for Blues music was insatiable and he spent many years devoting himself to the techniques of Eric Clapton, Stevie Ray Vaughan, Albert King, Albert Collins, Robert Cray, John Lee Hooker, Buddy Guy, etc., ...

As time passed, Johnny began to hunger for more than being a blues guitar player. In the process of becoming 'whole' musically, Johnny felt compelled to start singing and writing his own material. Since that realization he's been on a feverish journey, honing his craft and finding his home in the world of music.

Johnny Cox's debut CD, *The Thin Blue Line*, represents the palette of his musical personality. On this CD, he embraces many Roots styles but in his heart he's still a junkie for the Blues; playing guitar in his sleep and bending every note.
