

Modern, creative and versatile are impressions you'll get by listening to SECRETS OF SIN's debut FUTURE MEMORIES (out August 30th, 2013). Catchy melodies and choruses mixed with lovely hooks leave you humming for days. The mashup between modern metal and symphonic orchestra combined with two distinctive voices creates an impressive LP which definitely flashes your mind.

A lot has changed since the 5 musicians from Germany released their first demo 'Fairytale' in their year of founding in 2009. Several performed gigs, a new female singer, the recording of FUTURE MEMORIES and their first video shoot for the single INSIDE formed the band to a more grown up and experienced unit. But there still is no end in sight. SECRETS OF SIN are just at the beginning of their possibilities.

Their current release FUTURE MEMORIES, recorded between April and July '12, holds up with many unexpected songs which still have new things to discover even after several times of listening. Either fast songs, ballads or a 12 minute piece. You always get the impression that SECRETS OF SIN do clearly know what they are doing.

Let THE JOKER show you his game or be carried away by SHADOWS. 2013 definitely is going to be an eventful year.
