[WWII Album Cover]

## Walls Within | WWII

Take a journey with a premier metal group from the heart of New Mexico. Walls Within is an original four piece progressive metal band from Albuquerque, formed in late 2010. The band approach to music can be described in a few simple sentences: Write songs that are heavy, yet melodic; brutal, but beautiful; technical and complex. Walls Within does not exist just to provide music to be listened to. Walls Within exists to allow the music to be felt in you.

With the release of their debut EP titled "WWI" in 2012, which had great underground and critic success, the band journeys deeper into the spectrum of what drives the human consciousness with their full length album titled "WWII". Both WWI and WWII were produced and recorded by Ross Falcon and David Butler of Matchbox Studios, Austin TX and mastered at Fascination Street Studios by the great Jens Bogren.
